Family friendly climate control.

Personalise your home's comfort with iZone.

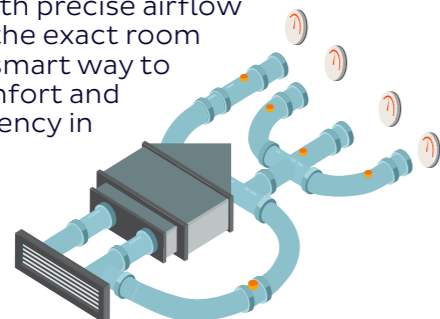

Step into a world of comfort with iZone Smart Air Conditioning. Our Nova Climate Control System is not just efficient and cost-effective, it's also all about personalising your home's climate. Imagine keeping every room cozy or cool, exactly how you like it, with precision control for up to 14 zones. And with our real-time adjustments, your home will always feel just perfect.

Unlock savings through our climate by design.

Embark on a journey of comfort and savings with our tailored temperature control options. Whether you're looking to spend a bit more upfront for long-term efficiency or prefer immediate savings, we've got you covered. Our unique Advanced Constant Control means our system fits perfectly in your home, bypass control included or not. It's all about giving you the perfect balance of comfort and savings.

Bypass Control for enhanced energy efficiency.

iZone's Bypass Control cleverly manages excess air, channelling it away from zones to avoid overpowering drafts. This ensures a consistent climate across all rooms. With precise airflow matched to the exact room size, it's the smart way to enhance comfort and energy efficiency in your home.

Some of the controls shown here together.

1-14 Zones for as many rooms.

Personalised Scenes.

Fully adjustable fan speed.

Mount portrait or landscape.

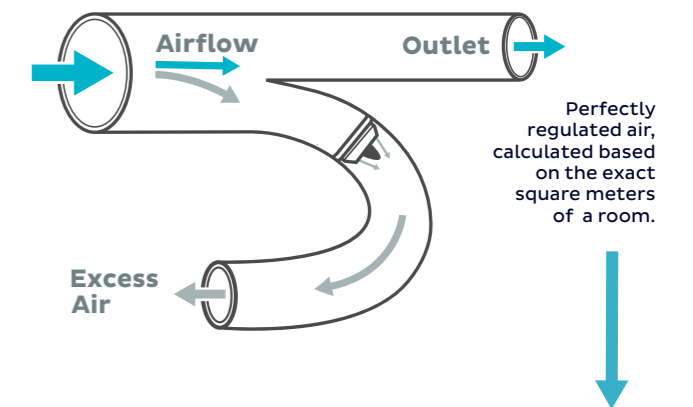

Multiple owner profiles.

Arrange your home screen.

Recipes of actions and triggers.

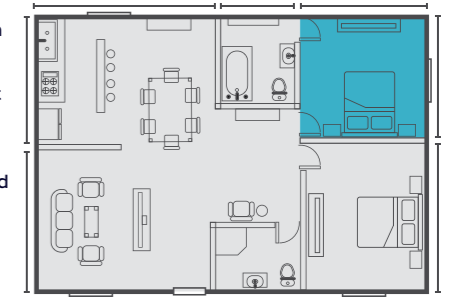

Personal home screen image.

7 inch or 10 inch screen.

Diverted excess air leaves through a constant vent with 1 degree accuracy using iZone's advanced constant control algorithm.

iZone accomplished this remarkable capability through extensive years of engineering dedication.

Setting the benchmark for precision climate control.

Welcome to a new era of degree perfect climate control. The Nova Climate Control System empowers you to be the master of your own home, adjusting airflow from a whisper to a breeze, anywhere from 0% to 100%. Our system cleverly calculates the precise amount of air needed for each room by considering its exact size for just the right air distribution. The advanced constant control methodology sets the industry standard for innovation, allowing each room to receive air tailored to its unique dimensions.

Maximise savings with intelligent temperature management

iZone transforms climate control with intelligent sensors that efficiently redirect heated or cooled air between rooms, ensuring rapid achievement of set temperatures. Unlike systems using a single sensor for an entire home, iZone automatically scans all your sensors to optimise comfort in each room. This smart technology not only enhances your in-home comfort but significantly reduces running costs, setting a new standard in personalised climate management.

The intuitive Nova wall controller is easy to customise

Effortlessly tailor your iZone Home app to your lifestyle. Pin essential zones and devices for quick access, invite family members to customise their screens, and organise everything into convenient 'rooms'. Create 'recipes' for automated actions and view multiple iZone systems and air conditioning units on one intuitive, personalised screen. This is simple smart climate control at its best.

Monitor energy usage and slash your power bill.

iZone Smart Monitoring simplifies energy savings for your home.

Streamline your energy use and trim your bills with iZone Smart Monitoring. Keep tabs on appliance consumption and cleverly align their operation with off-peak tariffs to reduce costs.

If you have solar, you can maximize free daytime energy to further cut expenses.

Energy Cost

Fresh air integration						•

Scrooge Mode and Fan Auto Control are your wallet's best friend.

Embrace your inner scrooge with Economy Settings, allowing you to set temperature boundaries, like 22 to 24 degrees. Everyone can still adjust the temperature, but only within the 'scrooge range', helping you keep a tight leash on energy usage and bills.

For more smart energy savings, iZone's Fan Auto Control automatically adjusts the system's fan speed according to how many zones are being heated or cooled. It's convenient, efficient, and wallet-friendly!

- Create triggers & actions.
- Scrooge Mode.
- Forecast settings.
- Monitoring reports.
- Energy savings modes.

- Auto off options and set points.
- AC Bypass control.
- iZone intelligent control.
- Fresh night air integration.
- Reduce costs with auto actions.

iSave is an optional feature that requires additional hardware, but it's an investment that pays off in comfort and cost-efficiency.

Embrace the future of home energy efficiency.

With the Nova Climate Control System, you're not just getting a state-of-the-art air-conditioning system; you're stepping into the world of advanced, customisable smart homes. Imagine extending this energy-efficient, anywhere-anytime control to your lighting, irrigation, entertainment, and even non-Wi-Fi devices like garage doors and blinds.

By integrating and controlling all these aspects of your home, you could easily reduce your energy bills. Nova isn't just about managing your home's climate; it's about empowering you with a full suite of timesaving, energy-conserving, and planet-friendly features for a truly smart home experience.

Save energy with natural night cooling.

Discover the charm of iSave, our innovative night cooling system. By harnessing cool night air instead of relying on your air-con, iSave keeps your home pleasantly cool during warm summer nights. This natural method means you can enjoy thousands of dollars in savings over time.

The Nova Climate Control System evolves with your household.

Design your unique climate control system with Nova.

The Nova Climate Control System evolves with your household, perfectly aligning with your changing needs and budget.

Start simple by controlling a single smart device, then seamlessly advance to managing multiple zones, schedules, and smart devices with our integrated recipes.

Nova isn't just another system; it's a bespoke solution that adapts to your lifestyle and budget changes, allowing for future growth without a full system overhaul.

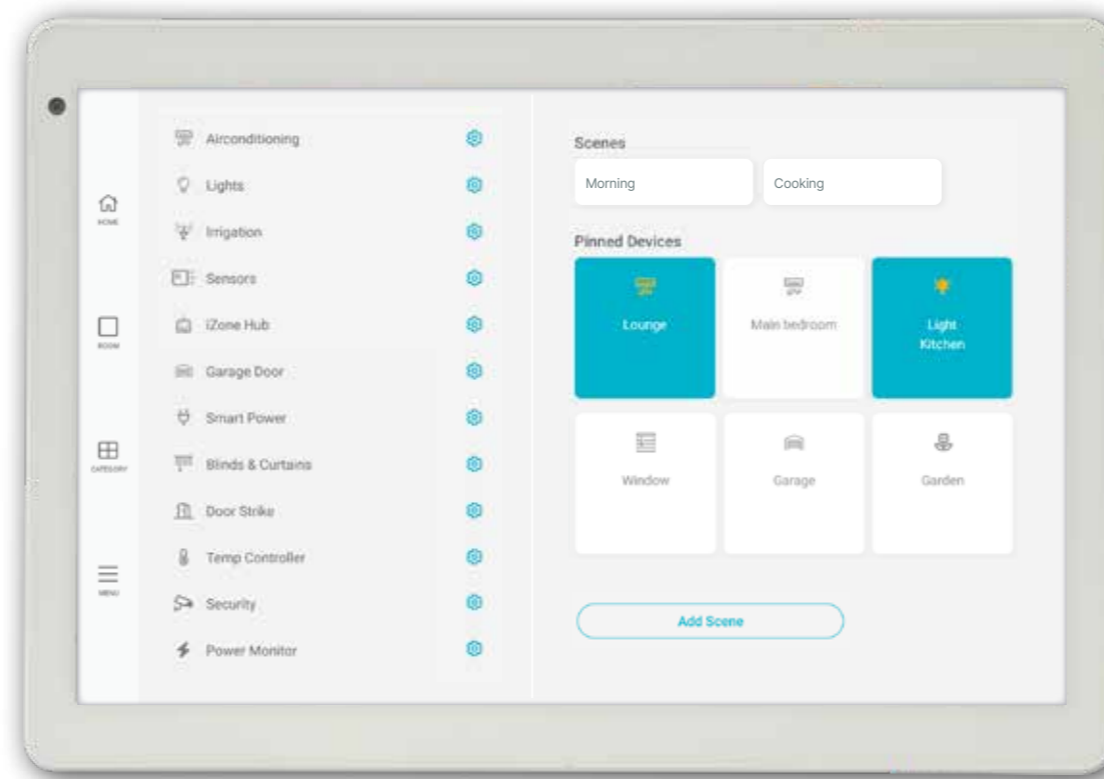

With its energy-efficient design and cost-effective zone control, the Nova Climate Control System offers a range of affordable, energy-saving options, each tailored to fit your needs and ensure your family's comfort.

16 Million colours.

Music & lights sync.

Candle Effect.

Open your garage door.

Open the front door with your voice.

Turn on your kettle.

Turn on the washing machine.

Peace of mind that comes from dealing with a local.

As an Australian company, iZone is committed to enriching the lives of Australian homeowners with our easy-to-use, smart technology. We're right here with you, offering extensive support through resources like iZonepedia, handy 'how-to' videos, and a responsive support ticketing system.

Our commitment to quality is unwavering, evidenced by our 5-year warranty and an impressively low warranty rate. With iZone, Australian homes become smarter, more comfortable, and reliably supported. Conditions apply. See warranty details at iZone.com.au

Secure, smart home privacy you can trust.

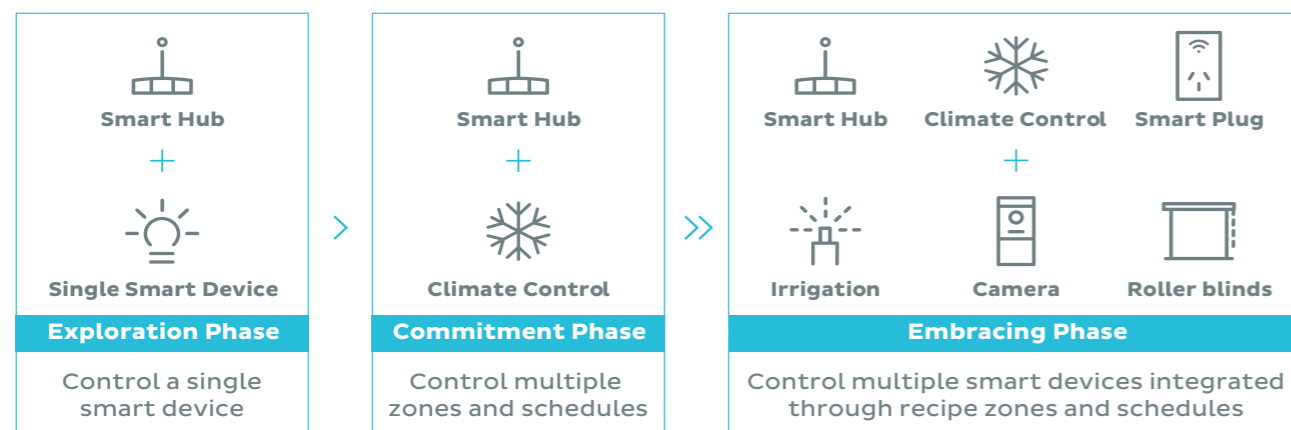

iZone protects your privacy by integrating robust, industry-leading security into every aspect of your smart home.

Our touchscreen controllers, designed with embedded firmware, ensure your data is secure and free from internet vulnerabilities, while transparent data practices and user-friendly controls give you the power to make informed decisions, keeping what happens in your home, in your home. Trust iZone for seamless, secure smart home experiences that prioritise your family's safety.

Turn your house into a smart home with iZone.

Embrace the future with iZone, where turning any house into a smart home is a breeze. Our wireless system seamlessly integrates into your home, from adjusting the air conditioning to dimming the lights, watering the garden, and even boiling the kettle. iZone makes your home more comfortable, efficient, secure, and truly liveable, by simplifying daily life with advanced technology right at your fingertips.

Unrivalled comfort and convenience.
